

PRD_Contracts_Module

Contract Lifecycle, Obligations and Commercial Governance

Full Product Requirements Document for Product, UX, Frontend, Backend, QA, Security and DevOps Teams

The Contracts Module is the legal and commercial source of truth for every formal agreement across the platform. It connects parties, clauses, financial terms, obligations, milestones, deliverables, approvals, documents, payments, amendments, renewals, claims and compliance.

Global rule: every contract page, section, widget, action and workflow must support Platform Configuration. The initial implementation exposes the complete capability set; user-type restrictions are added later.

Status: Confirmed product scope

Version: 1.0

Audience: Full-stack implementation team

1. Document Control

Field	Value
Document	PRD_Contracts_Module
Primary pages	Contracts Module Page, Contract Page
Connected modules	Companies, CRM, Projects, Units, Documents, Tasks, Meetings, Approvals, Finance, Assets, Risks, HR, Compliance
Initial access model	Full capability first; restrictions later
Platform Configuration	Mandatory compatibility at module, page, section, widget, feature, action and workflow level
Core ownership rule	Contracts defines legal terms and obligations; Finance owns transactions, Documents owns files, Tasks owns execution, Approvals owns decisions

2. Product Vision

- Provide one universal contract system for sales, purchases, construction, employment, leases, services, loans, insurance, partnerships and custom agreements.
- Track each contract from draft through review, approval, signature, activation, performance, renewal, termination and closure.
- Convert legal terms into structured obligations, milestones, deliverables and payment schedules.
- Keep signed contracts immutable while supporting controlled amendments and addenda.
- Connect every contract to the correct parties, companies, projects, units, clients, suppliers, documents, payments, risks and tasks.
- Provide complete auditability and future permission readiness.

The Contract Page is a governed lifecycle workspace, not only a PDF viewer.

3. Scope and Boundaries

- In scope: contracts, parties, clauses, financial terms, payments, obligations, milestones, deliverables, documents, approvals, signatures, amendments, renewals, terminations, claims, guarantees, compliance, risks, reports and settings.
- In scope: desktop, tablet and mobile behavior.
- In scope: data model, APIs, validation, audit, performance, security and testing.
- Out of scope: third-party digital-signature integration in the initial phase.
- Out of scope: final permissions matrix and jurisdiction-specific legal advice.

4. Information Architecture

- Contracts Module Page
- Contract Page
- Create Contract
- Contract Templates
- Contract Parties
- Terms and Clauses
- Financial Terms
- Payment Schedule
- Obligations
- Milestones

- Deliverables
- Documents and Revisions
- Approvals
- Signature Tracking
- Amendments and Addenda
- Renewals
- Expiry Management
- Suspension
- Termination
- Closure
- Claims and Disputes
- Guarantees and Insurance
- Compliance
- Risks
- Tasks
- Meetings
- Activity Timeline
- Reports
- Contract Settings

5. Contracts Module Header

- Create Contract
- Global Search
- Filters
- Saved Views
- List, Card and Timeline views
- Import
- Export
- Contract Templates
- Platform Configuration status

6. Contracts Module Summary Cards

- Total contracts
- Draft
- Under review
- Awaiting approval
- Awaiting signature
- Active
- Expiring soon
- Overdue obligations
- Suspended
- Terminated
- Completed
- Total contract value

- Outstanding payable and receivable value

Clicking a summary card applies the corresponding filter.

7. Contract Cards and Rows

- Contract title
- Contract code
- Contract type
- Primary parties
- Owning company
- Linked project, unit, client or supplier
- Contract value
- Currency
- Effective date
- Expiry date
- Status
- Responsible user
- Approval status
- Signature status
- Obligation progress
- Expiry warning
- Personal Star

Clicking a contract opens the Contract Page.

8. Contracts Module Filters

- Group
- Company
- Contract type
- Status
- Party
- Client
- Supplier
- Project
- Unit
- Responsible user
- Department
- Value range
- Currency
- Effective date
- Expiry date
- Renewal status
- Approval status
- Signature status
- Has overdue obligations

- Expiring soon
- Starred by me

9. Contract Header

- Contract title
- Contract code
- Contract type
- Status
- Main parties
- Owning company
- Responsible user
- Contract value
- Currency
- Effective date
- Expiry date
- Renewal status
- Approval state
- Signature state
- Confidentiality level

10. Contract Header Actions

- Edit
- Submit for review
- Request approval
- Mark ready for signature
- Activate
- Add amendment
- Renew
- Suspend
- Terminate
- Close
- Upload document
- Create task
- Schedule meeting
- Add claim
- Add risk
- Archive

11. Contract Types

- Sales contract
- Purchase contract
- Service agreement
- Construction contract

- Subcontract
- Supplier agreement
- Employment contract
- Rental or lease
- Reservation agreement
- Framework agreement
- Consultancy agreement
- NDA
- Partnership agreement
- Loan agreement
- Insurance policy
- Maintenance agreement
- Software license
- Government contract
- Custom

Contract types are configurable and not hard-coded.

12. Contract Identity and Metadata

- Contract code
- External reference
- Title
- Description
- Contract type
- Owning company
- Department
- Responsible user
- Legal jurisdiction
- Governing law
- Contract language
- Confidentiality level
- Internal version
- Original signing date
- Effective date
- Expiry date
- Auto-renewal
- Notice period
- Status
- Tags

13. Status Lifecycle

- Draft
- Internal Review
- Awaiting Approval

- Approved
- Awaiting Signature
- Partially Signed
- Active
- Expiring
- Renewed
- Completed
- Suspended
- Disputed
- On Hold
- Terminated
- Cancelled
- Superseded
- Archived

Status transitions must be explicit, validated and audited.

14. Contract Parties

- Company or individual
- Party role
- Legal name
- Registration or ID number
- Address
- Authorized representative
- Contact person
- Email
- Phone
- Signing authority
- Payment responsibility
- Status

15. Party Roles

- Client
- Buyer
- Seller
- Employer
- Contractor
- Subcontractor
- Supplier
- Consultant
- Tenant
- Landlord
- Lender
- Borrower

- Insurer
- Beneficiary
- Guarantor
- Custom

Party roles are configurable.

16. Terms and Clause Library

- Scope
- Price
- Payment terms
- Delivery
- Timeline
- Acceptance
- Warranty
- Liability
- Confidentiality
- Intellectual property
- Insurance
- Compliance
- Termination
- Force majeure
- Dispute resolution
- Governing law
- Data protection
- Custom clauses

The clause library supports reusable structured clauses and free-form contract text.

17. Clause Record

- Clause title
- Clause number
- Text
- Clause type
- Mandatory or optional
- Owner
- Related obligation
- Risk level
- Revision status
- Source template
- Effective version

18. Financial Terms

- Contract value
- Currency

- Tax
- Discount
- Retention
- Advance payment
- Deposit
- Payment schedule
- Installments
- Milestone payments
- Penalties
- Bonuses
- Commission
- Price adjustment
- Exchange-rate basis
- Receivable or payable classification

Transactional values must link to Finance.

19. Payment Schedule

- Description
- Amount
- Percentage
- Due date
- Trigger
- Invoice requirement
- Approval requirement
- Paid amount
- Remaining amount
- Payment status
- Linked invoice
- Linked transaction
- Overdue days

Payment items define obligations; Finance records actual invoices and transactions.

20. Obligations

- Title
- Responsible party
- Responsible user
- Description
- Due date
- Priority
- Status
- Evidence required
- Linked document
- Linked task

- Linked milestone
- Completion date
- Overdue warning

Every obligation must be attributable to a party and auditable.

21. Milestones

- Milestone title
- Description
- Planned date
- Actual date
- Responsible party
- Payment trigger
- Approval trigger
- Deliverables
- Status
- Delay
- Linked project milestone

22. Deliverables

- Deliverable title
- Type
- Responsible party
- Due date
- Acceptance criteria
- Required documents
- Review status
- Approval status
- Accepted by
- Acceptance date
- Rejection reason

23. Linked Records

- Group
- Company
- Department
- Team
- User
- Client
- Contact
- Supplier
- Project
- Building
- Unit

- Opportunity
- Reservation
- Purchase
- Invoice
- Payment
- Asset
- Task
- Meeting
- Approval
- Risk
- Document

One contract may link to multiple business records without duplicating them.

24. Documents and Revisions

- Draft contract
- Signed contract
- Annexes
- Addenda
- Specifications
- Drawings
- Invoices
- Certificates
- Insurance
- Guarantees
- Correspondence
- Termination notices

The signed contract is immutable. Changes require an amendment or addendum.

25. Approval Workflow

- Legal review
- Finance review
- Technical review
- Department approval
- Executive approval
- Board approval
- Final authorization
- Approval chain
- Current approver
- Pending approvals
- Comments
- Returned changes
- Approval history

26. Signature Tracking

-
- Not ready
 - Ready for signature
 - Sent externally
 - Partially signed
 - Fully signed
 - Declined
 - Expired unsigned
 - Signatory
 - Party
 - Signature date
 - Signature method
 - Signed document
 - Witness or notary information

Digital signature integration is future scope; signature status is self-contained in the initial release.

27. Amendments and Addenda

- Amendment code
- Parent contract
- Reason
- Changed clauses
- Value impact
- Time impact
- Scope impact
- Effective date
- Approval status
- Signature status
- Documents

The original contract remains unchanged.

28. Renewal

- Renewal type
- Proposed new term
- New value
- New expiry date
- Notice deadline
- Owner
- Approval required
- Renewal status
- Renewal documents

Renewal statuses: Not Required, Upcoming, Under Review, Approved, Renewed, Not Renewed.

29. Expiry Management

- Expiry date
- Notice date
- Renewal deadline
- Reminder schedule
- Responsible user
- Expiry risk
- Required action
- Expiring in 7 days
- Expiring in 30 days
- Expiring in 60 days
- Expiring in 90 days
- Expired
- Renewal overdue

30. Suspension

- Reason
- Start date
- Expected resolution
- Responsible user
- Financial impact
- Outstanding obligations
- Supporting documents

31. Termination

- Termination type
- Initiated by
- Reason
- Notice date
- Effective date
- Penalty
- Outstanding obligations
- Settlement
- Linked notice
- Approval
- Final status

32. Contract Closure

- All obligations completed
- Payments settled
- Deliverables accepted
- Final documents uploaded
- Claims resolved
- Closure approval

- Closed date
- Archive readiness

33. Claims and Disputes

- Claim title
- Claiming party
- Responding party
- Description
- Value
- Date submitted
- Evidence
- Status
- Negotiation history
- Resolution
- Settlement value
- Linked legal case
- Linked tasks and documents

34. Guarantees, Bonds and Insurance

- Performance guarantee
- Advance-payment guarantee
- Warranty bond
- Bank guarantee
- Insurance policy
- Retention guarantee
- Provider
- Beneficiary
- Amount
- Currency
- Issue date
- Expiry date
- Conditions
- Status
- Document
- Reminder

35. Compliance

- Required licenses
- Certifications
- Insurance
- Tax documents
- Regulatory approvals
- Safety requirements

- Data-protection clauses
- Sanctions/compliance checks
- Missing requirement warning
- Expiry tracking

36. Contract Risks

- Financial risk
- Legal risk
- Delivery risk
- Supplier risk
- Client risk
- Compliance risk
- Schedule risk
- Payment risk
- Termination risk
- Owner
- Probability
- Impact
- Mitigation
- Status

37. Tasks

- Review
- Revision
- Approval
- Signature
- Payment
- Renewal
- Compliance
- Deliverable
- Termination
- Claims

Task privacy remains participant-based.

38. Meetings

- Negotiation meetings
- Review meetings
- Signature meetings
- Contract-performance meetings
- Dispute meetings
- Renewal meetings
- Minutes
- Decisions

- Action items

39. Activity Timeline

- Contract created
- Party added
- Clause changed
- Review requested
- Approval completed
- Signed
- Activated
- Payment due
- Obligation completed
- Amendment created
- Risk added
- Claim opened
- Renewed
- Suspended
- Terminated
- Closed
- Archived

Each event stores acting user, timestamp, source module and linked record.

40. Reports and Analytics

- Contracts by status
- Contract value by company
- Receivable/payable contracts
- Expiring contracts
- Overdue obligations
- Payment performance
- Amendment value impact
- Supplier contract performance
- Client contract performance
- Claims and disputes
- Renewal rate
- Contract-cycle time
- Approval time
- Risk exposure

41. Contract Templates

- Contract type
- Default clauses
- Required fields
- Approval workflow

- Party roles
- Default obligations
- Default milestones
- Payment schedule structure
- Required documents
- Numbering format
- Template version

Templates are versioned; existing contracts retain their original template version.

42. Contract Numbering

- Company prefix
- Contract type prefix
- Year
- Project code
- Department code
- Sequence
- Examples: CTR-2027-0001, SALE-BR-2027-014, SUP-AL-000045

43. Contract Settings

- Contract types
- Party roles
- Statuses
- Clause library
- Templates
- Numbering
- Renewal reminders
- Approval requirements
- Signature statuses
- Obligation types
- Guarantee types
- Confidentiality levels
- Archive rules

44. Platform Configuration Compatibility

- Module enable/disable
- Page enable/disable
- Section enable/disable
- Widget enable/disable
- Feature enable/disable
- Action enable/disable
- Workflow enable/disable
- Contract type configuration
- Clause library configuration

- Template configuration
- Renewal rules
- Claims and disputes toggle
- Guarantees toggle

Disabled items disappear from navigation, search, APIs and layouts without dead links or blank spaces.

45. Responsive UX

- Desktop: wide contract header, sticky section navigation, multi-column overview, tables and preview drawers.
- Tablet: two-column layout, collapsible navigation, drawers for detail panels.
- Mobile: compact sticky header, horizontally scrollable tabs, card-based lists, bottom action sheet.
- All core contract actions remain available on mobile.

46. Premium Motion and Micro-interactions

- Contract card hover: 120-180 ms lift, shadow and border tint.
- Status lifecycle: restrained step transition.
- Obligation progress: smooth interpolation.
- Clause expansion: soft height animation.
- Approval timeline: staggered reveal.
- Preview drawer: 220-280 ms slide and fade.
- Expiry warnings: subtle pulse only when critical.
- Loading: skeletons matching final geometry.
- Respect reduced-motion settings.

47. Empty, Loading and Error States

- No contracts
- No parties
- No obligations
- No milestones
- No payments
- No amendments
- No claims
- No guarantees
- Module disabled
- Source module unavailable
- Partial widget failure
- Archived contract

48. Core Data Model

Entity	Purpose	Key fields
Contract	Primary agreement	id, tenant_id, company_id, type_id, code, title, status, value, currency, effective_at, expires_at, owner_id
ContractType	Configurable type	id, tenant_id, name, status

Entity	Purpose	Key fields
ContractParty	Party relation	contract_id, party_entity_type, party_entity_id, role_id, representative_id, status
ContractPartyRole	Configurable role	id, tenant_id, name, status
ContractClause	Structured clause	id, contract_id, clause_type, number, title, body, risk_level, revision_no
ContractFinancialTerm	Financial terms	contract_id, value, tax, retention, advance, discount, exchange_basis
ContractPaymentSchedule	Payment obligation	id, contract_id, amount, percentage, due_at, trigger, status, invoice_id
ContractObligation	Party obligation	id, contract_id, party_id, owner_id, title, due_at, status, evidence_required
ContractMilestone	Milestone	id, contract_id, title, planned_at, actual_at, status, payment_trigger
ContractDeliverable	Deliverable	id, contract_id, title, due_at, acceptance_criteria, review_status, approval_status
ContractDocument	Document link	contract_id, document_id, role, signed_copy, effective_version
ContractApproval	Approval link	contract_id, approval_id, stage, status
ContractSignature	Signature tracking	contract_id, party_id, signatory_id, status, signed_at, document_id
ContractAmendment	Amendment	id, contract_id, code, reason, value_impact, time_impact, effective_at, status
ContractRenewal	Renewal process	id, contract_id, proposed_expiry, proposed_value, notice_at, status
ContractTermination	Termination record	id, contract_id, type, reason, notice_at, effective_at, settlement_value
ContractClaim	Claim/dispute	id, contract_id, claimant_party_id, respondent_party_id, value, status
ContractGuarantee	Guarantee/bond	id, contract_id, type, provider_id, beneficiary_id, amount, expires_at, status
ContractCompliance	Requirement	id, contract_id, requirement_type, due_at, status, document_id
ContractRisk	Risk link	contract_id, risk_id
ContractActivity	Activity event	contract_id, actor_id, event_type, source_module, entity_id, occurred_at
ContractTemplate	Versioned template	id, tenant_id, type_id, version, status, config_json

49. Data Ownership Rules

- Contracts owns legal terms, party roles, obligations, milestones, deliverables, amendments, renewals, terminations, claims and template structure.
- Finance owns invoices, payments, balances, refunds and accounting entries.
- Documents owns files, revisions and previews.
- Tasks owns operational execution and participant visibility.
- Approvals owns decision records and approval history.
- Companies and CRM own canonical party records.
- Projects and Units own project/unit operational data.
- Contract summaries must be reproducible from source records.
- Archive or termination must not delete linked history.

50. API Requirements

- GET /contracts
- POST /contracts
- GET /contracts/{id}
- PATCH /contracts/{id}
- POST /contracts/{id}/submit-review
- POST /contracts/{id}/request-approval
- POST /contracts/{id}/activate
- POST /contracts/{id}/suspend
- POST /contracts/{id}/terminate
- POST /contracts/{id}/close
- POST /contracts/{id}/archive
- POST /contracts/{id}/restore
- GET /contracts/{id}/parties
- POST /contracts/{id}/parties
- GET /contracts/{id}/clauses
- POST /contracts/{id}/clauses
- GET /contracts/{id}/financial-terms
- PATCH /contracts/{id}/financial-terms
- GET /contracts/{id}/payment-schedule
- POST /contracts/{id}/payment-schedule
- GET /contracts/{id}/obligations
- POST /contracts/{id}/obligations
- GET /contracts/{id}/milestones
- POST /contracts/{id}/milestones
- GET /contracts/{id}/deliverables
- POST /contracts/{id}/deliverables
- GET /contracts/{id}/documents
- POST /contracts/{id}/documents
- GET /contracts/{id}/approvals
- POST /contracts/{id}/amendments
- POST /contracts/{id}/renewals
- POST /contracts/{id}/claims
- POST /contracts/{id}/guarantees
- GET /contracts/{id}/activity
- GET /contract-templates
- POST /contract-templates
- GET /contract-types
- GET /contract-reports

Aggregated endpoints should return summaries and deep links instead of duplicating complete records from connected modules.

51. Frontend Architecture

- ContractsModulePage
- ContractsSummaryCards

- ContractsFilterBar
- ContractsTable
- ContractCard
- ContractPage
- ContractHeader
- ContractOverview
- ContractPartiesPanel
- ClauseLibraryPanel
- FinancialTermsPanel
- PaymentSchedulePanel
- ObligationsPanel
- MilestonesPanel
- DeliverablesPanel
- ContractDocumentsPanel
- ContractApprovalsPanel
- SignatureTrackingPanel
- AmendmentsPanel
- RenewalPanel
- TerminationPanel
- ClaimsPanel
- GuaranteesPanel
- CompliancePanel
- RisksPanel
- ContractActivityTimeline
- ContractReportsPage
- ContractSettingsPage

52. Backend Services and Background Jobs

- Contract CRUD service
- Lifecycle transition service
- Party service
- Clause/template service
- Financial-term service
- Obligation and milestone service
- Deliverable service
- Approval integration service
- Signature tracking service
- Amendment service
- Renewal and expiry scheduler
- Termination and closure service
- Claims and guarantees service
- Compliance checker
- Activity feed builder
- Search indexing service

- Configuration resolver
- Cache invalidation service

All background jobs must be idempotent, tenant-aware and safe to retry.

53. Validation Rules

- Contract title and type required.
- Contract code unique in configured scope.
- At least one owning company and two parties required for bilateral agreements.
- Effective date cannot follow expiry date.
- Payment percentages and amounts must reconcile where required.
- Obligation due date validation.
- No circular amendment parentage.
- Signed contract cannot be edited directly.
- Amendment effective date cannot precede parent contract unless explicitly supported.
- Renewal notice and expiry logic validated.
- Termination requires reason and effective date.
- Closure requires required conditions or explicit override.
- Archive requires impact confirmation.
- Currency and amount validation.

54. Security and Permission Readiness

- Tenant isolation
- Company scope validation
- Confidentiality-level readiness
- Sensitive financial field readiness
- Read and edit audit for clauses and signed documents
- No linked-module access expansion through Contract Page
- Section-level, field-level and action-level permission readiness
- Platform Configuration and permissions evaluated separately

A user seeing a contract summary must not automatically gain access to confidential documents, payments or HR records.

55. Performance and Scalability

- Load header and critical status first.
- Lazy-load heavy sections.
- Cursor pagination for obligations, activity and claims.
- Virtualize large contract lists.
- Avoid N+1 aggregation queries.
- Precompute expiry and obligation summaries.
- Incrementally update counters through domain events.
- Support millions of contracts and activity events.
- Target initial interactive load below 2 seconds under normal enterprise conditions.

56. Audit and Event Model

-
- Every lifecycle transition creates an immutable event.
 - Every clause edit stores before/after metadata.
 - Every party change is logged.
 - Every approval/signature status change is logged.
 - Every amendment/renewal/termination is linked to the initiating user.
 - Activity events store actor, subject, event type, timestamp, source module and linked record.
 - Sensitive events should support read-audit later.

57. Testing Strategy

Unit tests

- Lifecycle transitions
- Code uniqueness
- Date validation
- Payment schedule reconciliation
- Obligation status
- Amendment immutability
- Renewal timing
- Termination and closure rules
- Platform Configuration resolution

Integration tests

- Companies/CRM parties
- Projects and Units
- Finance payments
- Documents revisions
- Tasks privacy
- Approvals
- Risks and compliance
- Activity feed

End-to-end tests

- Create contract from template
- Add parties
- Add clauses
- Define payment schedule
- Create obligations
- Request approval
- Track signatures
- Activate
- Add amendment
- Renew
- Open claim
- Terminate
- Close
- Disable a section through Platform Configuration

- Mobile behavior

Visual regression

- Contracts Module desktop
- Contract Page desktop
- Tablet
- Mobile
- Long contract title
- Large obligations table
- Disabled-section reflow
- Reduced-motion mode

58. Acceptance Criteria

- AC-01 - Users can create, edit, review, approve, sign-track, activate, suspend, terminate, close, archive and restore contracts.
- AC-02 - Contracts support multiple configurable types and party roles.
- AC-03 - Signed contracts are immutable.
- AC-04 - Amendments and addenda preserve the original contract.
- AC-05 - Financial terms and payment schedules link to Finance.
- AC-06 - Obligations, milestones and deliverables are structured and traceable.
- AC-07 - Contracts link to all defined source modules.
- AC-08 - Approval and signature history are visible.
- AC-09 - Renewal and expiry management are supported.
- AC-10 - Claims, guarantees and compliance requirements are supported.
- AC-11 - Tasks preserve participant-based visibility.
- AC-12 - Activity history is complete and auditable.
- AC-13 - Templates and numbering are configurable.
- AC-14 - Desktop, tablet and mobile retain core actions.
- AC-15 - Premium animations are implemented.
- AC-16 - Reduced-motion preferences are respected.
- AC-17 - Every contract element supports Platform Configuration.
- AC-18 - Disabled features leave no dead links or blank spaces.
- AC-19 - Large contract datasets remain performant.
- AC-20 - The module is ready for future field-level permissions.

59. Page and Flow Registry

- Contracts Module Page
- Contract Page
- Create Contract
- Edit Contract
- Contract Template Setup
- Add Contract Party
- Clause Editor
- Financial Terms Setup
- Payment Schedule Setup

- Obligation Setup
- Milestone Setup
- Deliverable Setup
- Contract Review Flow
- Contract Approval Flow
- Signature Tracking
- Activate Contract
- Amendment/Addendum Flow
- Renewal Flow
- Expiry Management
- Suspension Flow
- Termination Flow
- Contract Closure
- Claim/Dispute Flow
- Guarantee Setup
- Compliance Checklist
- Contract Activity Timeline
- Contract Reports
- Contract Settings
- Archive Contract
- Restore Contract

60. Implementation Phases

- Phase 1: Contract entity, types, parties, lifecycle, numbering and Platform Configuration.
- Phase 2: Contract Page, clauses, financial terms, payment schedules and responsive UI.
- Phase 3: Obligations, milestones, deliverables, documents, approvals and signatures.
- Phase 4: Amendments, renewals, expiry, suspension, termination and closure.
- Phase 5: Claims, guarantees, compliance, risks, reports and audit hardening.
- Phase 6: Performance, accessibility, security and complete test coverage.

61. Future Roadmap

- Digital signature integrations
- Clause extraction and AI review
- Jurisdiction-specific contract packs
- External counterparty portal
- Automated compliance verification
- AI risk suggestions
- Contract negotiation comparison
- External legal-system integrations

Future integrations and AI are not part of the initial implementation.

62. Final Architectural Rule

Contracts define the legal agreement, structured obligations and commercial terms. Finance records actual transactions, Documents owns files and revisions, Tasks executes work,

Approvals records decisions, and the Contract Page aggregates these records without duplicating ownership.
