

PRD_6

Professional and Contractor Public Sign-Up

Platform Approval, Pending Profile and Public Network Access

Document	PRD_6
Status	Full-Stack Product and Technical Requirement
Compatibility	Additive to PRD_1 through PRD_5
Primary users	Independent professionals, contractor applicants and Platform Admins
Private workspace rule	Internal company users remain Company Admin-created or invited
Implementation priority	Public onboarding foundation for Careers, Tenders and Business Network

Current interface reference

The screenshot below represents the current placeholder state. It must be replaced by the interactive sign-up, onboarding, review and approval experience defined in this PRD. The displayed brand may be replaced by the platform-configured brand without changing the workflow requirements.

Figure 1. Current public sign-up placeholder page - reference only.

Core rule: A public applicant may build and edit a profile before approval, but cannot use the active professional, contractor, job, tender, messaging or company-workspace functions until the Platform Admin approves the profile.

Document map

Area	Sections
Product scope and lifecycle	1-6
Account and profile onboarding	7-10
Submission and pending experience	11-12
Platform Admin review	13-16
Approved profile capabilities	17-21
Integrity, notifications and audit	22-26
Technical specification	27-30

Acceptance and end-to-end workflow	31-32
------------------------------------	-------

1. Purpose

Replace the static Professional and contractor sign-up page with a complete public registration and Platform Admin approval workflow.

- Create a public account and verify the email address.
- Select the correct profile type.
- Complete a professional or contractor profile.
- Upload CVs, portfolio works, certifications and supporting documents.
- Submit the profile for Platform Admin review.
- Continue editing the profile while approval is pending.
- Receive approval, restricted approval, requested changes, rejection or suspension.
- Activate the correct public network capabilities only after approval.

2. Scope and compatibility rules

Non-interference rule: PRD_6 extends the existing Business Network, Careers, Contractor, Tender and Company Workspace requirements. It does not replace private company account creation, role permissions, company tenancy, task workflows or Platform Admin governance defined in earlier PRDs.

- Public sign-up is for independent professionals and contractors or contractor companies.
- Internal company workspace accounts continue to be created or invited by a Company Admin.
- Approval of a public profile does not automatically grant access to a private company workspace.
- An approved public profile may later be invited into one or more company contexts, subject to the existing role and tenancy rules.
- Public profile information and private company data must remain separated.

3. Supported account types

3.1 Professional

For individuals working in construction, architecture, engineering, design, management and supporting disciplines.

- Architect, Interior Designer, Structural Engineer, Civil Engineer, Mechanical Engineer, Electrical Engineer, MEP Engineer.
- Quantity Surveyor, Project Manager, Site Manager, BIM Specialist, CAD Technician, Surveyor.
- HSE Specialist, QA/QC Specialist, Legal Specialist, Finance Specialist, Procurement Specialist.
- Other construction professional selected from a Platform Admin-managed profession list.

3.2 Contractor

- Contractor company or subcontractor company.
- Sole trader or independent contractor.
- Specialist trade contractor.
- Supplier with installation services.
- Other approved contractor type managed by Platform Admin.

The selected profile type controls the onboarding fields, required evidence, review checklist, search category and post-approval capabilities.

4. Account lifecycle and statuses

Status	System meaning
DRAFT	Registration started but not submitted. User may save, upload and resume.
EMAIL_VERIFICATION_REQUIRED	Account exists but submission is blocked until email verification.
PROFILE_INCOMPLETE	Email verified; mandatory fields or documents are still missing.
READY_TO_SUBMIT	All mandatory profile requirements are complete.
PENDING_PLATFORM_REVIEW	Application submitted and waiting for Platform Admin decision.
CHANGES_REQUESTED	Platform Admin requires corrections, clarifications or new documents.
RESUBMITTED	Applicant completed requested changes and submitted again.
APPROVED	Profile is active with permitted public network functionality.
APPROVED_WITH_RESTRICTIONS	Profile is active, but selected functions or verification marks remain restricted.
REJECTED	Application rejected with a mandatory reason.
SUSPENDED	Previously approved profile temporarily disabled by Platform Admin.
DEACTIVATED	User has deactivated the account.

Every status change must be backend-controlled, permission-validated and recorded in an immutable application timeline.

5. Sign-up entry page

Recommended route:

/signup

Optional: /signup/professional and /signup/contractor

5.1 Page structure

Field / capability	Requirement	Notes
Header	Required	Platform logo, Sign in, language selector, Help, Privacy and Terms.
Main heading	Required	Create your professional profile.
Supporting text	Required	Explain CV, portfolio, contractor profile and company connection benefits.
Professional card	Required	Description and Continue as Professional action.
Contractor card	Required	Description and Continue as Contractor action.
Existing account link	Required	Already have an account? Sign in.
Responsive layout	Required	Desktop, tablet and mobile.

Suggested copy: Join the Construction OS professional network. Create your CV, showcase your work and connect with verified construction companies.

6. Registration workflow

Use a multi-step onboarding process with persistent progress and manual save. The applicant must see the current step, completed steps, missing fields, profile completion percentage and the ability to exit and resume.

Account Type

- > Account Details
- > Profile Information
- > Experience or Company Details
- > Portfolio and Documents
- > Review
- > Submit

7. Account details and email verification

7.1 Required account fields

Field / capability	Requirement	Notes
Email address	Required	Must be unique and verified.
Username	Required	Must be available and normalized.
Password	Required	Must satisfy configured security requirements.
Confirm password	Required	Must match password.
Preferred language	Required	English or Albanian at launch.
Country	Required	Used for location and compliance context.
Time zone	Required	May default from country but must be editable.
Account type	Required	Professional or Contractor.
Terms of Service	Required	Explicit acceptance with version and timestamp.
Privacy Policy	Required	Explicit acceptance with version and timestamp.
Referral or invitation code	Optional	May pre-link an invitation, campaign or company request.

7.2 Validation and verification

- Validate email syntax and uniqueness.
- Validate username availability.
- Validate password policy and confirmation.
- Block submission until Terms and Privacy are accepted.
- Send a time-limited email verification link.
- Allow secure resend with rate limiting.

- Record verification time, IP/security event and token consumption.
- Do not expose whether unrelated private accounts exist beyond safe recovery messaging.

8. Professional profile onboarding

8.1 Basic profile

Field / capability	Requirement	Notes
First name and last name	Required	Legal or professional display name.
Professional title	Required	Public title displayed on profile.
Primary profession	Required	Selected from managed profession taxonomy.
Profile photo	Required	Subject to image validation and moderation.
Country and city	Required	General professional location.
Professional headline	Required	Short market-facing headline.
Professional summary	Required	Detailed background and focus.
Years of experience	Required	Validated numeric range.
Employment status	Required	Employed, self-employed, freelance, seeking work or other.
Availability status	Required	Available now, available from date, not available or open to offers.

8.2 Contact information and visibility

Field / capability	Requirement	Notes
Professional email	Required	May differ from login email if verified.
Phone number	Optional	Country code required.
Website	Optional	Validated URL.
LinkedIn	Optional	Validated URL.
Portfolio website	Optional	Validated URL.
Address or general location	Optional	Precise address must remain private by default.
Preferred contact method	Optional	Platform message, email or phone.
Field visibility	Required	Private, approved companies only, selected companies or public where allowed.

8.3 CV management

Field / capability	Requirement	Notes
PDF CV upload	Supported	Recommended public document format.
Word CV upload	Supported	DOC or DOCX, scanned and securely stored.

Structured CV builder	Supported	Experience, education, skills, languages and certifications.
CV versions	Required	Every replacement becomes a new revision.
Active CV	Required	User selects the version presented to companies.
File metadata	Required	Name, version, type, size, upload time and visibility.

8.4 Structured experience

Field / capability	Requirement	Notes
Employer or client	Required	Organization or client name.
Position and employment type	Required	Role and relationship type.
Country and city	Optional	Work location.
Start and end dates	Required	Supports currently working here.
Role description and responsibilities	Required	Structured narrative.
Projects completed	Optional	May link to portfolio entries.
Skills used	Optional	Links to skill taxonomy.
Reference contact	Optional	Private unless permission granted.
Verification status	System	Unverified, submitted, verified or disputed.

8.5 Education

Field / capability	Requirement	Notes
Institution	Required	School, university or training provider.
Degree and field of study	Required	Structured degree and discipline.
Country	Optional	Location.
Start and graduation dates	Required	Supports ongoing study.
Diploma or certificate	Optional	Secure document upload.
Verification status	System	Admin or trusted-source status.

8.6 Skills, software and languages

Field / capability	Requirement	Notes
Professional skills	Required	Architecture, engineering, BIM, cost, project management, QA/QC, HSE and other managed skills.
Software skills	Optional	AutoCAD, Revit, Archicad, 3ds Max, Blender, Rhino, Grasshopper, Navisworks, Unreal Engine, Civil 3D, Tekla, Primavera, Microsoft Project, IMOS and others.

Skill level	Optional	Company-configurable or platform-standard scale.
Years and last-used date	Optional	Supports matching and freshness.
Languages	Optional	Reading, writing and speaking levels.
Language certificates	Optional	Secure upload and verification.

8.7 Certifications and licenses

Field / capability	Requirement	Notes
Certification name	Required	Name of license or certificate.
Issuing organization	Required	Issuer.
Certificate number	Optional	Protected where sensitive.
Issue and expiry dates	Optional	Expiry reminders when applicable.
Country	Optional	Jurisdiction.
Verification URL	Optional	External evidence URL.
Document upload	Optional	Secure file with visibility and review status.

8.8 Portfolio works

Field / capability	Requirement	Notes
Project title and type	Required	Managed project taxonomy.
Location and completion year	Optional	General location and year.
Employer or client	Optional	Subject to confidentiality.
Role in project	Required	Clearly identify personal contribution.
Description and services	Required	Scope and contribution.
Software used	Optional	Links to skill taxonomy.
Project status	Required	Concept, ongoing, completed or confidential summary.
Cover image and gallery	Required / Optional	At least one visual where relevant.
Documents and media	Optional	PDF, video, drawing, 3D model link and external link.
Supported files	System	JPG, PNG, PDF, MP4, DWG, DXF, IFC, RVT where supported, and ZIP subject to security rules.
Ownership declaration	Required	User confirms ownership or permission to publish.

8.9 Professional preferences

Field / capability	Requirement	Notes
Engagement types	Optional	Full-time, part-time, freelance and remote.

Relocation	Optional	Availability and preferred countries or cities.
Expected salary	Optional	Visibility-controlled.
Preferred project types	Optional	Used for job and invitation matching.
Preferred company types	Optional	Developer, contractor, studio, consultant or other.
Work authorization	Optional	Country or region authorization.
Notice period	Optional	Immediate or time period.
Availability date	Optional	Specific future date.

9. Contractor profile onboarding

9.1 Contractor type

Field / capability	Requirement	Notes
Registered company	Supported	Legal entity.
Sole trader	Supported	Registered individual business.
Independent contractor	Supported	Individual trade or service provider.
Specialist subcontractor	Supported	Trade-specialized business.
Supplier and installer	Supported	Material supply with installation capability.

9.2 Company or business details

Field / capability	Requirement	Notes
Legal business name	Required	Must support duplicate detection.
Trading name	Optional	Public-facing name.
Registration number	Required where applicable	Jurisdiction-specific.
VAT or tax number	Required where applicable	Visibility restricted.
Country of registration and legal structure	Required	Compliance context.
Founding year	Optional	Validated year.
Headquarters	Required	General location; precise address private by default.
Main contact person	Required	Authorized representative.
Business email and phone	Required	Verification may be required.
Website	Optional	Validated domain.
Company size and employee count	Optional	Ranges or exact values.
Short and full descriptions	Required	Public overview and detailed capability statement.

9.3 Service categories

Field / capability	Requirement	Notes
Primary service	Required	Exactly one primary category.
Additional services	Optional	Multiple managed categories.
Example categories	System taxonomy	General construction, facade, concrete, steel, roofing, electrical, plumbing, HVAC, fire protection, fit-out, flooring, painting, joinery, aluminium, glass, landscaping, excavation, road works, demolition, waterproofing, scaffolding, equipment rental and other specialist trades.

9.4 Operational coverage and capacity

Field / capability	Requirement	Notes
Countries, regions and cities served	Required	Search and tender matching.
Maximum project distance	Optional	Distance or travel logic.
International availability	Optional	Yes or no with countries.
Typical project size	Optional	Small, medium, large or value range.
Minimum and maximum contract value	Optional	Currency-aware.
Active teams and available workforce	Optional	Capacity indicators.
Equipment capacity	Optional	High-level capability summary.

9.5 Contractor documents

Field / capability	Requirement	Notes
Registration and VAT certificates	Required where applicable	Secure and reviewable.
Trade license	Required where applicable	Issue, expiry and authority.
Insurance certificates	Required where applicable	Professional liability, workers and other coverage.
HSE and QA/QC certifications	Optional / required by trade	Expiry-aware.
Bank details	Optional	Strictly private and access-controlled.
NDA and company presentation	Optional	Document-controlled.
Organization chart	Optional	May support key personnel review.
Authorized representative ID	Optional / jurisdictional	Strictly private.
Document metadata	Required	Type, issue date, expiry, issuer, review status and notes.

9.6 Contractor portfolio

Field / capability	Requirement	Notes
Project name, client and main contractor	Required / optional	Confidentiality-aware.
Location and project type	Required	Searchable taxonomy.

Scope of work	Required	Trade-specific contribution.
Contract value	Optional	Visibility-controlled.
Start and completion dates	Required	Supports ongoing work.
Description and team size	Required / optional	Capability evidence.
Photos and videos	Optional	Moderated media.
Completion certificate	Optional	Secure upload.
Client or contact reference	Optional	Private until consent.
Public visibility	Required	Per-project setting.

9.7 Team and responsible contacts

Field / capability	Requirement	Notes
Company owner or Managing Director	Optional	Contact record only unless invited as user.
Commercial and tender contacts	Optional	Used for invitations and tenders.
Project and Site Managers	Optional	Key personnel.
HSE, Finance and Legal contacts	Optional	Specialist contacts.
Account creation rule	System	Adding a contact does not automatically create a Construction OS login.

9.8 Contractor CV or company profile

Field / capability	Requirement	Notes
Independent contractor or sole trader	Required	Personal CV, experience, certifications and portfolio.
Contractor company	Required	Company profile or presentation, key personnel summaries and optional team CVs.
Versioning	Required	New file revision without overwriting the prior file.
Visibility	Required	Sensitive information remains private.

10. Save, exit and resume

- Manual Save draft, Save and continue, and Exit and continue later actions.
- Return the user to the latest incomplete onboarding step after sign-in.
- Show profile completion percentage and missing mandatory items.
- Persist partially completed forms without requiring submission.
- Distinguish saved draft data from formally submitted application data.
- Prevent silent data loss and warn before leaving a page with unsaved changes.

Example progress state: Profile 65% complete - Basic information complete; CV missing; two portfolio projects added; certification document missing; profile not submitted.

11. Review and submission

Before submission, show a complete profile summary and validation report.

- Account details.
- Profile details.
- CV or company profile.
- Experience or company capability.
- Portfolio.
- Certifications and verification documents.
- Contact information and visibility settings.
- Missing or invalid required information.

The applicant must confirm that information is accurate, uploaded work is owned or authorized, submitted documents are genuine, Platform Admin may review the information, and false information may cause rejection or suspension.

Primary action: Submit for review

12. Pending approval experience

After submission, the user can sign in but receives a restricted Pending Profile dashboard instead of active network access.

12.1 Pending dashboard

Field / capability	Requirement	Notes
Status banner	Required	Your profile is under review.
Submission metadata	Required	Submission date, application ID, status and last update.
Completion information	Required	Profile percentage and missing optional improvements.
Review information	Required	Review stage, admin messages and requested changes.
Profile editor	Required	Continue editing allowed sections.
Preview	Required	Preview future public or company-visible profile.
Submission history	Required	Original submission and subsequent changes.

12.2 Allowed while pending

- Edit profile information and descriptions.
- Add work experience or contractor capability.
- Upload or replace CV or company profile.
- Add portfolio projects.
- Add certifications and contractor documents.
- Change profile photo.
- Preview the future profile.

- Respond to Platform Admin questions.
- Submit additional evidence.

12.3 Restricted while pending

- No appearance in public search.
- No job applications.
- No tender applications.
- No company messaging.
- No company invitations.
- No public profile publication.
- No private workspace access.
- No public posts.
- No verified status.

12.4 Editing submitted information

- Application remains pending.
- Every change is logged.
- Platform Admin sees which fields changed and when.
- Major changes to identity, registration, profession, company details or verification documents return affected sections to Review required.
- Previously reviewed values remain accessible in version history.

13. Platform Admin application dashboard

Platform Administration

-> Applications

-> Professional and Contractor Sign-ups

13.1 Review queue filters

Field / capability	Requirement	Notes
Application status	Required	New, pending, changes requested, resubmitted, approved, rejected and suspended.
Profile type	Required	Professional or Contractor.
Location and category	Required	Country, profession or service category.
Submission age	Required	Submission date and SLA aging.
Risk and completeness	Required	Risk flags, missing documents and profile percentage.
Reviewer	Required	Unassigned or assigned reviewer.

13.2 Application card

Field / capability	Requirement	Notes
Applicant identity	Required	Name or legal company name.
Profile category	Required	Profession or contractor service category.
Country	Required	Applicant or registration country.

Submission date	Required	Latest submission.
Completion and verification	Required	Profile completion and evidence status.
Risk indicators	Required	Duplicates, suspicious documents or inconsistency flags.
Previous applications	Required	Existing related applications or account history.
Assigned reviewer	Required	Platform Admin owner.

14. Platform Admin review actions

Action	Required behavior
Approve	Activate the profile and permitted functionality.
Approve with restrictions	Activate profile while withholding selected capabilities or verification marks.
Request changes	Select specific fields or sections and provide instructions.
Request additional documents	Define document, reason, deadline and whether mandatory.
Reject	Reject with mandatory reason and any reapplication rule.
Suspend	Temporarily disable an approved profile.
Escalate	Send identity, fraud, duplicate, legal or document concerns for further review.

No review action may be performed through a normal comment. Every decision must use a dedicated action, require appropriate permissions and create a formal audit event.

15. Platform Admin review checklist

15.1 Professional application

- Identity information is consistent.
- Email is verified.
- CV is readable.
- Profession is correctly selected.
- Experience appears credible.
- Portfolio is relevant.
- Required certifications are valid.
- No prohibited content.
- No apparent stolen portfolio content.
- Duplicate profile check completed.

15.2 Contractor application

- Legal business name and registration information are provided.
- VAT or tax information exists where applicable.
- Primary authorized contact is identified.
- Service categories are relevant.
- Required business documents are uploaded.
- Insurance is valid where required.

- Portfolio appears credible.
- Duplicate contractor-company check completed.
- Compliance and risk issues are reviewed.

16. Changes-requested and resubmission workflow

1. Application status becomes CHANGES_REQUESTED.
2. User receives in-app and email notification.
3. Requested fields or sections are highlighted.
4. Admin instructions appear beside each relevant field.
5. User edits the requested information and uploads evidence.
6. User selects Resubmit for review.
7. Status becomes RESUBMITTED.
8. Original submission, review comments and all prior versions remain visible.

17. Approval result

When approved, the system must:

- Change the application status to APPROVED or APPROVED_WITH_RESTRICTIONS.
- Activate the public professional or contractor profile.
- Generate a permanent profile ID and number series value.
- Publish the profile according to visibility settings.
- Enable permitted job, tender, invitation and messaging capabilities.
- Add an approval event to the immutable profile timeline.
- Send an in-app and email approval notification.
- Keep private workspace access disabled until a company invitation is accepted.

18. Approved professional capabilities

- Maintain a professional profile, CV, portfolio, skills, certificates and licenses.
- Apply for jobs and receive job invitations.
- Be discovered by authorized HR users.
- Receive company workspace invitations.
- Message authorized companies according to platform rules.
- Control profile and contact visibility.
- Build a Construction Passport.
- Receive verified employment and project-history entries.

19. Approved contractor capabilities

- Maintain a contractor profile, services, capacity, projects, references and compliance documents.
- Apply for public or invited tenders.
- Receive project and qualification invitations.
- Communicate with authorized companies.
- Be linked to a company Contractor Master record.
- Receive access to a contractor portal only after explicit company invitation.
- Maintain responsible contacts.
- Respond to prequalification and document requests.

20. Profile visibility and privacy

Profile type	Available visibility
Professional	Private; verified companies only; selected companies; public.
Contractor	Private; company directory; verified companies only; public.

The following must never be public: identification documents, bank details, precise private addresses, insurance evidence, internal review notes, rejection history, risk flags and verification evidence.

Visibility must be enforced by the backend, not only hidden in the frontend.

21. Linking an approved profile to company workspaces

Public Professional or Contractor Profile
 + Company Workspace A
 + Company Workspace B, where permitted
 + Contractor Portal, where invited

1. Applicant creates and receives approval for a public profile.
2. A verified company searches for the approved profile or uses an invitation link.
3. Company Admin sends a workspace or contractor-portal invitation.
4. Applicant accepts the invitation.
5. The same login gains a separate company context with company-defined roles and permissions.
6. Public profile data and private workspace data remain isolated.
7. Switching context must never expose information between companies.

22. Duplicate prevention and ownership recovery

Check potential duplicates using email, phone, legal company name, registration number, VAT number, website domain and professional license number.

- Show a safe message that a similar profile may exist.
- Offer Sign in, Recover account, Request ownership, or Continue for manual review.
- Do not automatically merge profiles.
- Flag likely duplicates for Platform Admin review.
- Preserve evidence and ownership-transfer decisions in the audit timeline.

23. Notifications

Recipient	Events
Applicant	Verify email; draft incomplete; submitted; under review; information required; changes requested; approved; rejected; suspended; document expiring; company invitation.
Platform Admin	New submission; resubmission; requested document uploaded; duplicate or risk flag; SLA exceeded; verification document invalid or expiring.

Channels: in-app and email at launch; WhatsApp only when enabled by platform and user preferences. Security-sensitive notifications must not disclose private application details in message previews.

24. Audit and immutable history

Every application and profile must have a complete immutable timeline.

- Account created and email verified.
- Profile section completed.
- File uploaded, replaced or removed from active use.
- Application submitted.
- Reviewer assigned.
- Application opened by admin.
- Changes requested.
- Applicant responded and resubmitted.
- Application approved, restricted, rejected or suspended.
- Profile reactivated or deactivated.

Each event records actor, role, date, exact time, action, previous and new status, comment, related field or document, and security source information where appropriate. Events cannot be deleted; corrections create new events.

25. File and document management

- File-type and file-size validation.
- Malware and content scanning.
- Secure object storage.
- Revision history and active-version selection.
- Uploader and exact upload time.
- Document category and profile relationship.
- Issue and expiry dates.
- Visibility classification.
- Platform Admin verification status and notes.
- Authorization-protected downloads and non-predictable URLs.
- No silent overwrite of submitted or verified documents.

26. Security requirements

- Password hashing using an approved modern algorithm.
- Mandatory email verification.
- Rate limiting and abuse monitoring.
- Optional CAPTCHA for suspicious registration behavior.
- Revocable sessions and secure reset workflow.
- Malware scanning for every upload.
- Audited Platform Admin access and decisions.
- Applicant cannot set or manipulate approval status.
- Backend authorization for every profile, file and action.
- Private files use signed or authorization-protected access.
- Strict tenant and company-context isolation after invitations.
- Secrets, email tokens and storage keys held in a secure secrets manager.
- Consent versions and timestamps retained for legal evidence.

27. Recommended backend entities

PublicAccount
 ProfessionalProfile
 ContractorProfile
 ProfileApplication
 ApplicationReview
 ApplicationStatusHistory
 ApplicationChangeRequest
 ProfileDocument
 ProfessionalExperience
 ProfessionalEducation
 ProfessionalSkill

 ProfileAuditEvent

All profile records must reference the owning public account. Application snapshots or versioned values must allow reviewers to compare the current draft with the submitted version.

28. Suggested API surface

28.1 Applicant APIs

POST /api/public-signup
 POST /api/public-signup/verify-email
 POST /api/public-signup/resend-verification
 GET /api/onboarding/status
 PATCH /api/onboarding/account
 PATCH /api/onboarding/professional-profile
 PATCH /api/onboarding/contractor-profile
 POST /api/onboarding/documents
 POST /api/onboarding/portfolio
 POST /api/onboarding/submit
 GET /api/onboarding/application
 POST /api/onboarding/resubmit
 GET /api/onboarding/history

28.2 Platform Admin APIs

GET /api/platform/applications
 GET /api/platform/applications/:applicationId
 POST /api/platform/applications/:applicationId/assign-reviewer
 POST /api/platform/applications/:applicationId/approve
 POST /api/platform/applications/:applicationId/approve-with-restrictions
 POST /api/platform/applications/:applicationId/request-changes
 POST /api/platform/applications/:applicationId/request-documents
 POST /api/platform/applications/:applicationId/reject
 POST /api/platform/applications/:applicationId/suspend
 POST /api/platform/applications/:applicationId/reactivate
 GET /api/platform/applications/:applicationId/history

28.3 API rules

- Use idempotency protection for registration, submission and review decisions.
- Validate state transitions server-side.
- Prevent duplicate active applications for the same account unless reapplication is explicitly allowed.
- Validate file ownership before linking uploads.
- Return permission-filtered and privacy-filtered data.
- Use pagination, filters and assignment locking in the review queue.
- Create audit events inside the same transaction as state-changing actions.

29. Permission matrix

Action	Draft user	Pending user	Approved user	Platform Admin
Edit own profile	Yes	Yes	Yes	No
Upload CV / portfolio	Yes	Yes	Yes	No
Submit application	Yes, when ready	No	No	No
Apply for jobs	No	No	Yes, professional	No
Apply for tenders	No	No	Yes, contractor	No
Receive company invitation	No	No	Yes	No
Review applications	No	No	No	Yes
Approve or request changes	No	No	No	Yes
Suspend or reactivate profile	No	No	No	Yes

30. Main frontend states

State	Required interface
New visitor	Account-type selection, benefits, Sign in and legal links.
Draft account	Onboarding steps, save/resume, completion percentage and missing fields.
Pending user	Review-status dashboard, editor, admin messages, preview and submission history.
Changes requested	Prominent action banner, field-level instructions and resubmit action.
Approved professional	Professional dashboard, profile, CV, portfolio, jobs, invitations and messages.
Approved contractor	Contractor dashboard, profile, documents, tenders, invitations and messages.
Rejected user	Reason, allowed appeal or reapplication route and support information.
Suspended user	Restricted dashboard with suspension reason and available response process.

All states must work in English and Albanian and remain responsive across desktop, tablet and mobile.

31. Acceptance criteria

1. A visitor can choose Professional or Contractor.
2. A professional or contractor can create an account and verify the email address.
3. The registration workflow supports manual save and resume.
4. Professional and contractor forms display different mandatory sections.
5. Professionals can upload versioned CVs and portfolio works.
6. Contractors can add legal details, services, coverage, documents, contacts and project references.
7. A user can preview the profile and see missing requirements before submission.
8. A valid completed profile can be submitted for Platform Admin review.
9. A pending applicant can sign in and continue editing the profile.
10. A pending applicant cannot use jobs, tenders, company messaging, invitations or private workspaces.
11. Platform Admin can filter, assign and open complete applications.
12. Platform Admin can approve, approve with restrictions, request changes, request documents, reject, suspend and reactivate.
13. Requested changes identify exact fields or sections.
14. Applicant can resubmit without losing earlier submissions or review history.
15. Approval activates only the correct professional or contractor capabilities.
16. Approval does not automatically provide private company workspace access.
17. Uploaded files are securely stored, scanned, versioned and permission-protected.
18. Every status and review action appears in an immutable audit timeline.
19. Duplicate profile and contractor checks are performed.
20. Profile and field visibility settings are enforced by backend authorization.
21. An approved profile can later accept a company workspace or contractor-portal invitation.
22. One login can switch contexts without exposing data between companies.
23. The experience works on desktop, tablet and mobile.
24. The user can switch between English and Albanian.
25. Existing internal company-account creation by Company Admin remains unchanged.

32. End-to-end workflow

Visitor opens Sign-up

- > Selects Professional or Contractor
- > Creates account
- > Verifies email
- > Completes profile
- > Uploads CV, portfolio and documents
- > Reviews application
- > Submits for Platform Admin review
- > Pending user can continue editing profile
- > Platform Admin reviews application
 - > Changes requested -> User updates and resubmits
 - > Rejected
 - > Approved or approved with restrictions
- > Profile becomes active
- > Jobs, tenders, invitations and permitted network access enabled
- > Private company workspace access remains invitation-controlled

Final product rule: Profile creation is open. Platform participation is approval-controlled. Private company access is invitation-controlled. These three states must remain technically and visually distinct.
