

PRD_Finance_Module

ERP-Grade Finance, Accounting and Financial Control

Full Product Requirements Document for Product, UX, Frontend, Backend, QA, Security and DevOps Teams

The Finance Module is the financial source of truth for the entire platform. It records accounting entries, invoices, payments, cash, receivables, payables, budgets, forecasts, taxes, cost allocations, loans, assets and financial statements across companies, projects, contracts, units and departments.

Global rule: every finance page, section, widget, workflow, report and action must support Platform Configuration. Posted financial entries are immutable and corrected through reversal or adjustment entries.

Status: Confirmed product scope
Version: 1.0
Audience: Full-stack implementation team

1. Document Control

Field	Value
Document	PRD_Finance_Module
Primary pages	Finance Dashboard, Accounting, Banking, AR, AP, Invoicing, Payments, Budgets, Forecasting, Statements, Reports, Settings
Connected modules	Group, Company, Departments, Teams, CRM, Contracts, Projects, Units, Documents, Tasks, Assets, Procurement, HR
Initial access model	Full capability first; restrictions later
Platform Configuration	Mandatory compatibility at module, page, section, widget, feature, action, workflow and report level
Core accounting rule	Posted entries are immutable; corrections use reversals, adjustments or credit/debit notes

2. Product Vision

- Provide a universal multi-company finance engine suitable for construction, real estate, services, logistics, manufacturing, healthcare, retail and hospitality.
- Serve as the financial source of truth across all modules.
- Support accrual and cash-basis reporting configurations.
- Support multi-currency, multi-entity and consolidated reporting.
- Provide complete traceability from financial statement to source transaction.
- Keep commercial context in CRM, Contracts, Projects and Units while Finance owns accounting results.

Finance records what happened financially; other modules provide business context.

3. Scope and Boundaries

- In scope: chart of accounts, ledger, journals, banking, receivables, payables, invoices, payments, budgets, forecasts, cost centers, taxes, payroll summary, assets finance, loans, investments, statements, reporting and audit.
- In scope: project, unit and contract financial views.
- In scope: responsive UX, APIs, data model, validation, security and testing.
- Out of scope: jurisdiction-specific statutory filing integrations in the initial release.
- Out of scope: final permissions matrix, live bank integrations and full payroll processing.

4. Finance Information Architecture

- Finance Dashboard
- Accounting
- Chart of Accounts
- General Ledger
- Journal Entries
- Fiscal Periods
- Banking
- Receivables
- Payables
- Invoicing
- Payments

- Revenue
- Expenses
- Budgets
- Forecasting
- Cost Centers
- Project Finance
- Unit Finance
- Contract Finance
- Procurement Finance
- Payroll Summary
- Assets Finance
- Loans
- Investments
- Taxes
- Financial Statements
- KPI Dashboard
- Reports
- Audit
- Finance Settings

5. Finance Dashboard

- Cash position
- Revenue
- Expenses
- Gross profit
- Net profit
- EBITDA
- Receivables
- Payables
- Overdue invoices
- Upcoming payments
- Budget usage
- Forecast variance
- Tax liabilities
- Project profitability
- Unit collections
- Contract commitments
- Recent financial activity

Dashboard widgets are configurable, drillable and source-linked.

6. Accounting Core

- Double-entry accounting
- Chart of Accounts

- General Ledger
- Journal entries
- Posting rules
- Opening balances
- Recurring journals
- Accruals
- Deferrals
- Reversals
- Adjustments
- Period close
- Year-end close
- Trial balance

Every posted journal must balance: total debits equal total credits.

7. Chart of Accounts

- Account code
- Account name
- Account type
- Parent account
- Normal balance
- Currency
- Company
- Tax behavior
- Posting allowed
- Active/inactive status
- Financial statement mapping
- Cost center requirement
- Project requirement

Chart structures may vary by company while supporting group consolidation.

8. Journal Entries

- Journal number
- Date
- Fiscal period
- Description
- Source module
- Source record
- Debit lines
- Credit lines
- Currency
- Exchange rate
- Cost center
- Project

- Unit
- Contract
- Attachments
- Status: Draft, Approved, Posted, Reversed

Posted journals are immutable.

9. Fiscal Years and Periods

- Fiscal year
- Period number
- Start/end dates
- Open, soft-closed, closed, locked
- Opening balances
- Closing adjustments
- Reopen process
- Audit trail

10. Multi-Currency

- Company base currency
- Transaction currency
- Reporting currency
- Exchange rate date
- Rate source
- Manual rate override
- Realized FX gain/loss
- Unrealized FX revaluation
- Consolidation currency

No external exchange-rate integration in the initial phase.

11. Banking and Cash

- Bank accounts
- Cash accounts
- Petty cash
- Transfers
- Bank fees
- Deposits
- Withdrawals
- Statements
- Reconciliation
- Unreconciled items
- Opening balance
- Closing balance

12. Bank Reconciliation

- Statement import/manual entry
- Transaction matching
- Partial matching
- Split matching
- Unmatched items
- Fees and adjustments
- Reconciliation date
- Reconciliation status
- Audit history

Automatic bank feeds are future scope.

13. Accounts Receivable

- Customer balances
- Sales invoices
- Receipts
- Credit notes
- Payment plans
- Deposits
- Collections
- Credit limits
- Aging
- Overdue balances
- Bad-debt allowance
- Write-off workflow

14. Accounts Payable

- Supplier balances
- Purchase invoices
- Debit notes
- Supplier payments
- Payment runs
- Due dates
- Aging
- Purchase liabilities
- Retention
- Advances
- Disputed invoices

15. Sales Invoices

- Invoice number
- Customer
- Contract
- Project

- Unit
- Issue date
- Due date
- Line items
- Quantity
- Unit price
- Discount
- Tax
- Total
- Currency
- Payment status
- Document
- Posting status

16. Purchase Invoices

- Supplier
- Purchase order
- Contract
- Project
- Invoice date
- Due date
- Line items
- Tax
- Retention
- Advance deduction
- Approval status
- Posting status
- Payment status

17. Credit Notes, Debit Notes and Proformas

- Reference invoice
- Reason
- Amount
- Tax impact
- Posting effect
- Approval
- Linked documents
- Status

Proformas do not post to the ledger until converted.

18. Payments

- Incoming payments
- Outgoing payments

- Deposits
- Installments
- Partial payments
- Refunds
- Advances
- Payment methods
- Bank/cash account
- Allocation to invoice
- Unapplied amount
- Posting status
- Reversal

19. Payment Plans

- Total amount
- Installment count
- Due dates
- Amounts/percentages
- Grace period
- Late fee rules
- Paid amount
- Remaining balance
- Next due date
- Overdue status
- Linked contract/unit/client

20. Revenue

- Product revenue
- Service revenue
- Rental revenue
- Subscription revenue
- Project revenue
- Unit sales
- Other income
- Revenue recognition date
- Deferred revenue
- Unbilled revenue

21. Expenses

- Operating expenses
- Payroll summary
- Marketing
- Utilities
- Travel

- Vehicles
- Office
- Software
- Professional services
- Maintenance
- Miscellaneous
- Expense category
- Cost center
- Project allocation

22. Budgets

- Company budgets
- Department budgets
- Team budgets
- Project budgets
- Cost-center budgets
- Account budgets
- Monthly/quarterly/annual periods
- Budget owner
- Approved amount
- Actual
- Committed
- Remaining
- Variance
- Revision history

Budget changes create revisions rather than overwriting the approved baseline.

23. Forecasting

- Revenue forecast
- Expense forecast
- Cash-flow forecast
- Profit forecast
- Receivables forecast
- Payables forecast
- Scenario planning
- Best/base/worst cases
- Assumptions
- Forecast version
- Variance to actual

24. Cost Centers

- Company
- Branch

- Department
- Team
- Project
- Building
- Unit
- Vehicle
- Asset
- Custom cost center
- Allocation rules
- Default account mapping

Financial dimensions should remain separate from the Chart of Accounts.

25. Project Finance

- Approved budget
- Committed cost
- Actual cost
- Revenue
- Receivables
- Payables
- Cash flow
- Profit
- Forecast
- Contracts
- Purchase orders
- Variations
- Retention
- Cost-to-complete

Projects provides context; Finance owns the monetary records.

26. Unit Finance

- Asking price
- Area price
- Balcony price
- Discount
- Tax
- Final contract price
- Reservation deposit
- Installments
- Paid amount
- Remaining amount
- Next due date
- Late amount
- Final settlement

- Unit profitability

27. Contract Finance

- Contract value
- Payment schedule
- Receivables
- Payables
- Retention
- Guarantees
- Penalties
- Bonuses
- Claims
- Amendment value impact
- Committed amount
- Paid amount

Contracts define obligations; Finance records transactions.

28. Procurement Finance

- Purchase requisitions
- Purchase orders
- Committed cost
- Goods received
- Purchase invoices
- Supplier payments
- Price variance
- Procurement reports

29. Payroll Summary

- Gross payroll
- Net payroll
- Employer costs
- Taxes
- Benefits
- Bonuses
- Overtime
- Department allocation
- Project allocation
- Payment status

Full payroll processing belongs to HR/Payroll; Finance receives summarized postings.

30. Assets Finance

- Asset cost
- Acquisition date

- Depreciation method
- Useful life
- Accumulated depreciation
- Net book value
- Impairment
- Maintenance cost
- Disposal
- Gain/loss on disposal
- Residual value

31. Loans and Borrowings

- Lender
- Principal
- Currency
- Interest rate
- Start date
- Maturity date
- Repayment schedule
- Interest accrual
- Outstanding balance
- Covenants
- Collateral
- Fees

32. Investments

- Investment type
- Issuer/asset
- Purchase value
- Current value
- Income
- Return
- Unrealized gain/loss
- Realized gain/loss
- Maturity
- Disposal

33. Taxes

- VAT/sales tax
- Corporate tax
- Withholding tax
- Payroll tax summary
- Tax codes
- Tax rates

- Input tax
- Output tax
- Tax liabilities
- Tax periods
- Tax reports

Tax configuration must be flexible; jurisdiction-specific filing is future scope.

34. Financial Statements

- Profit and Loss
- Balance Sheet
- Cash Flow Statement
- Trial Balance
- Statement of Equity
- General Ledger detail
- Aging reports
- Financial ratios
- Comparative periods
- Consolidated statements

35. KPI Dashboard

- Revenue
- Gross profit
- Net profit
- EBITDA
- Cash position
- Working capital
- Receivables
- Payables
- DSO
- DPO
- Burn rate
- Budget usage
- ROI
- Project margin
- Unit collection rate

Every KPI must show its formula and source data.

36. Reports

- Financial reports
- Executive reports
- Tax reports
- Audit reports
- Project reports

- Client reports
- Supplier reports
- Budget reports
- Cash forecasts
- Custom report builder later
- PDF/Excel export when enabled

37. Audit

- Journal history
- Transaction history
- Change log
- Posting history
- Reversal history
- Period close history
- User activity
- Sensitive read logging readiness
- [Source-document traceability](#)

Audit records are immutable.

38. Finance Settings

- Fiscal years
- Fiscal periods
- Numbering
- Currencies
- Exchange rates
- Tax rates
- Payment methods
- Bank accounts
- Chart of Accounts
- Posting rules
- Budget rules
- Cost centers
- Approval rules
- Financial statement mappings
- Archive rules

39. Platform Configuration Compatibility

- Finance module enable/disable
- Page enable/disable
- Section enable/disable
- Widget enable/disable
- Feature enable/disable
- Action enable/disable

- Workflow enable/disable
- Report enable/disable
- Tax feature toggle
- Loans toggle
- Investments toggle
- Assets finance toggle
- Project/unit finance toggles

Disabled functionality must disappear cleanly from navigation, search, APIs and layouts.

40. Responsive UX

- Desktop: wide dashboards, sticky finance navigation, dense tables, drill-down drawers.
- Tablet: two-column dashboards, collapsible navigation, horizontal table scrolling where unavoidable.
- Mobile: compact KPI cards, card-based transactions, bottom action sheet, simplified but complete entry forms.
- Core posting, approval and payment actions remain available on mobile where permitted.

41. Premium Motion and Micro-interactions

- KPI counters animate only on first load and meaningful refresh.
- Cards use 120-180 ms lift and border tint.
- Charts interpolate smoothly between periods.
- Posting confirmation uses restrained progress and success feedback.
- Reconciliation matches animate into grouped state.
- Preview drawers slide 220-280 ms.
- Critical overdue indicators use subtle pulse only when necessary.
- Loading skeletons match final geometry.
- Reduced-motion settings are respected.

42. Empty, Loading and Error States

- No accounts
- No invoices
- No payments
- No bank transactions
- No budget
- No forecast
- Closed fiscal period
- Unbalanced journal
- Module disabled
- Source module unavailable
- Partial dashboard failure
- Archived company

43. Core Data Model

Entity	Purpose	Key fields
Account	Chart of Accounts	id, company_id, code, name, type, parent_id, normal_balance, currency, status
FiscalPeriod	Accounting period	id, company_id, start_at, end_at, status
JournalEntry	Accounting document	id, company_id, number, date, period_id, source_module, source_id, status
JournalLine	Debit/credit line	journal_id, account_id, debit, credit, currency, rate, cost_center_id, project_id
BankAccount	Bank/cash account	id, company_id, type, currency, opening_balance, status
BankTransaction	Bank movement	id, bank_account_id, date, amount, direction, reference, reconciliation_status
Invoice	Sales/purchase invoice	id, company_id, type, party_id, number, issue_at, due_at, currency, total, status
InvoiceLine	Invoice detail	invoice_id, item, quantity, unit_price, discount, tax_code_id, account_id
Payment	Payment record	id, company_id, direction, party_id, amount, currency, date, method_id, bank_account_id, status
PaymentAllocation	Invoice allocation	payment_id, invoice_id, amount
Budget	Budget header	id, company_id, scope_type, scope_id, period, version, status
BudgetLine	Budget amount	budget_id, account_id, cost_center_id, amount, period
Forecast	Forecast version	id, company_id, type, scenario, period, version, status
CostCenter	Financial dimension	id, company_id, type, code, name, parent_id, status
TaxCode	Tax configuration	id, company_id, name, rate, input_account_id, output_account_id, status
AssetLedger	Asset finance record	asset_id, cost, depreciation_method, useful_life, accumulated_depreciation
Loan	Borrowing	id, company_id, lender_id, principal, currency, rate, maturity_at, status
FinanceActivity	Audit/activity	company_id, actor_id, entity_type, entity_id, event_type, occurred_at

44. Accounting and Data Ownership Rules

- Finance owns journals, invoices, payments, balances, budgets, forecasts, bank records and statements.
- CRM owns customer relationships.
- Contracts owns legal terms and payment obligations.
- Projects and Units own operational context.
- Documents owns files and revisions.
- HR owns employee/payroll detail; Finance receives summarized postings.
- Posted entries are never edited directly.
- Every financial record must reference its source module where applicable.
- All derived balances must be reproducible from posted entries.

45. API Requirements

- GET /finance/overview
- GET /accounts
- POST /accounts
- GET /journal-entries
- POST /journal-entries

- POST /journal-entries/{id}/post
- POST /journal-entries/{id}/reverse
- GET /fiscal-periods
- POST /fiscal-periods/{id}/close
- GET /bank-accounts
- POST /bank-accounts
- GET /bank-transactions
- POST /bank-reconciliations
- GET /invoices
- POST /invoices
- POST /invoices/{id}/post
- POST /invoices/{id}/credit-note
- GET /payments
- POST /payments
- POST /payments/{id}/allocate
- POST /payments/{id}/reverse
- GET /receivables/aging
- GET /payables/aging
- GET /budgets
- POST /budgets
- POST /budgets/{id}/revise
- GET /forecasts
- POST /forecasts
- GET /cost-centers
- GET /finance/projects/{id}
- GET /finance/units/{id}
- GET /finance/contracts/{id}
- GET /financial-statements/{type}
- GET /finance/reports
- GET /finance/audit

Financial APIs must validate company, period, currency, balance, posting state and Platform Configuration.

46. Frontend Architecture

- FinanceDashboardPage
- FinanceNavigation
- KPIGrid
- ChartOfAccountsPage
- GeneralLedgerPage
- JournalEntryPage
- FiscalPeriodsPage
- BankingPage
- ReconciliationWorkspace
- ReceivablesPage

- PayablesPage
- InvoicesPage
- InvoicePage
- PaymentsPage
- BudgetsPage
- ForecastingPage
- CostCentersPage
- ProjectFinancePage
- UnitFinancePage
- ContractFinancePage
- AssetsFinancePage
- LoansPage
- TaxesPage
- FinancialStatementsPage
- FinanceReportsPage
- FinanceAuditPage
- FinanceSettingsPage

47. Backend Services and Jobs

- Accounting engine
- Posting-rule service
- Ledger service
- Invoice service
- Payment and allocation service
- Receivables/payables service
- Bank reconciliation service
- Budget service
- Forecast service
- Currency revaluation service
- Tax calculation service
- Asset depreciation scheduler
- Loan amortization scheduler
- Period close service
- Statement generator
- Audit event writer
- Configuration resolver
- Cache invalidation service

All financial background jobs must be idempotent, deterministic and tenant-aware.

48. Validation Rules

- Journal entries must balance.
- Posted entries cannot be edited.
- Closed periods reject posting.

- Account and company scope must match.
- Invoice totals must reconcile to line, tax and discount totals.
- Payment allocations cannot exceed available payment or invoice balance.
- Currency and exchange-rate validation required.
- Budget revisions preserve prior versions.
- Bank reconciliation cannot duplicate matched transactions.
- Tax codes must map to valid accounts.
- Depreciation cannot exceed depreciable amount.
- Reversal must reference the original transaction.

49. Security and Permission Readiness

- Tenant and company isolation
- Sensitive financial read logging readiness
- Posting and reversal permissions readiness
- Period-close permissions readiness
- Bank-account visibility readiness
- Salary/payroll summary confidentiality readiness
- Section-level, field-level and action-level permission readiness
- No linked-module access expansion through Finance
- Platform Configuration and permissions evaluated separately

50. Performance and Scalability

- Use append-only ledger structures.
- Index by company, period, account, source and date.
- Precompute account balances and aging summaries.
- Use cursor pagination for transactions and audit logs.
- Virtualize large ledgers and invoice lists.
- Generate heavy statements asynchronously when needed.
- Support millions of journal lines and transactions.
- Target dashboard load below 2 seconds under normal enterprise conditions.
- Target cached drill-down interactions below 200 ms.

51. Audit and Immutability

- Every posting stores actor, timestamp, source and period.
- Every reversal links to the original entry.
- Every period close/reopen is logged.
- Every budget revision is versioned.
- Every invoice/payment status change is logged.
- Every bank reconciliation action is auditable.
- Audit events are immutable and exportable.

52. Testing Strategy

Unit tests

- Double-entry balance
- Invoice totals
- Payment allocation
- Aging
- Currency conversion
- Tax calculation
- Budget variance
- Depreciation
- Period close
- Platform Configuration resolution

Integration tests

- CRM/customer invoices
- Contracts/payment schedules
- Projects/cost centers
- Units/installments
- Procurement/AP
- HR/payroll summary
- Documents
- Audit events

End-to-end tests

- Create Chart of Accounts
- Post journal
- Create sales invoice
- Receive partial payment
- Allocate payment
- Create purchase invoice
- Pay supplier
- Reconcile bank
- Create budget revision
- Close period
- Generate statements
- Disable finance section through Platform Configuration
- Mobile behavior

Visual regression

- Finance Dashboard
- General Ledger
- Invoice Page
- Reconciliation Workspace
- Statements
- Tablet
- Mobile
- Disabled-section reflow
- Reduced-motion mode

53. Acceptance Criteria

- AC-01 - Finance supports multi-company, multi-currency accounting.
- AC-02 - Double-entry journals balance before posting.
- AC-03 - Posted entries are immutable and reversible.
- AC-04 - Fiscal periods support close and lock states.
- AC-05 - AR, AP, invoicing and payments are implemented.
- AC-06 - Bank and cash accounts support reconciliation.
- AC-07 - Budgets and forecasts support version history.
- AC-08 - Cost centers support company, department, project, unit and asset dimensions.
- AC-09 - Project, Unit and Contract Finance views link to source modules.
- AC-10 - Finance generates P&L, Balance Sheet, Cash Flow and Trial Balance.
- AC-11 - Taxes and exchange rates are configurable.
- AC-12 - Audit history is complete and immutable.
- AC-13 - Desktop, tablet and mobile retain core actions.
- AC-14 - Premium animations are implemented.
- AC-15 - Reduced-motion settings are respected.
- AC-16 - Every finance element supports Platform Configuration.
- AC-17 - Disabled features leave no dead links or blank spaces.
- AC-18 - Large transaction volumes remain performant.
- AC-19 - The module is ready for future field-level permissions.

54. Page and Flow Registry

- Finance Dashboard
- Chart of Accounts
- Account Page
- General Ledger
- Journal Entries
- Create Journal Entry
- Post Journal
- Reverse Journal
- Fiscal Periods
- Close Period
- Bank Accounts
- Bank Reconciliation
- Receivables
- Payables
- Sales Invoices
- Purchase Invoices
- Invoice Page
- Credit Note Flow
- Debit Note Flow
- Payments
- Payment Allocation

- Payment Reversal
- Budgets
- Budget Revision
- Forecasting
- Cost Centers
- Project Finance
- Unit Finance
- Contract Finance
- Procurement Finance
- Payroll Summary
- Assets Finance
- Loans
- Investments
- Taxes
- Financial Statements
- KPI Dashboard
- Finance Reports
- Finance Audit
- Finance Settings

55. Implementation Phases

- Phase 1: Company finance foundation, Chart of Accounts, fiscal periods, journals and Platform Configuration.
- Phase 2: Invoicing, receivables, payables, payments and banking.
- Phase 3: Budgets, forecasts, cost centers, project/unit/contract finance.
- Phase 4: Taxes, assets finance, loans, payroll summary and statements.
- Phase 5: Audit, performance, reports, responsive refinement and test hardening.

56. Future Roadmap

- Live bank feeds
- Payment gateways
- Statutory tax filing integrations
- Full payroll processing
- Electronic invoicing integrations
- Open banking
- AI cash-flow forecasting
- AI anomaly detection
- External ERP/accounting integrations

Future integrations and AI are not part of the initial implementation.

57. Final Architectural Rule

Finance is the financial source of truth. Contracts define legal obligations, CRM owns relationships, Projects and Units provide context, Documents owns evidence, and Finance records the actual accounting and cash consequences without duplicating ownership.
